Saskatchewan Horses Will Come to District

Some five or six hundred head of horses from the dried-out areas of Saskatchewan will be brought into the district to be fed and pastured during the winter. Several carloads have already been shipped and will arrive this week.

The Saskatchewan government has representatives in the district who are arranging for the placing of these horses and also buying straw and greenfeed to be shipped to the dried-out areas.

They are paying \$1 per head per month for horses for pasture and feed at straw stacks, the farmer having to water and provide salt.

Wheat straw is being bought at 50c per ton and oat straw at \$1 per ton. Greenfeed is being purchased according to grade.

Any farmers who can provide feed for horses, and those who have straw or greenfeed for sale, should get in touch with the secretaries of the municipalities.

Obituary.

MRS. CHLOE NICHOLS

Mrs. Chloe Nichols who resided with her daughter, Mrs. Dave Smith, northwest of town, passed away on Thursday last at the age of 76 years and 11 months.

Predeceased by her husband in 1931, she came from Oregon to Didsbury with her daughter, Mrs. R. D. Smith, in 1933, with whom she resided up to the time of her death. She was a member of the Rebekah Lodge and the Legion of Honor, and had been a member of the Christian Church since 15 years of age. She had been an invalid for several years.

She is survived by two daughters, Mrs. R. D. Smith, of Didsbury, Mrs. W. H. Batman, and two sons, Merle and Chester, all of Grant's Pass, Oregon.

Funeral services were held at the Durrer Funeral Chapel on Tuesday, with Rev. J. R. Geeson officiating. The remains were shipped to Junction City, Oregon, for interment.

In Appreciation

Of the splendid response to our 34th Anniversary Sale—

FREE CONCERT and PRIZE DRAWING, Tuesday Evening, at 8.30

Hockey Broadcast Starts Saturday

"Hello Canada—and hockey fans in Newfoundland and the United States! . . ." Once more, on Saturday, November 6th, Foster Hewitt's familiar greeting will sweep over a chain of stations from Coast to Coast. Fans in Canada—the United States—and even in more distant countries—will rally round their radios to hear the opening Imperial Oil Hockey Broadcast of the game between Toronto Maple Leafs and New York Americans, at Maple Leaf Gardens.

The Imperial Oil Hockey Broadcasts will expand this coming winter practically "blanketing" every province in Canada with the broadcasts of games played either in Toronto or in Montreal.

Last winter broadcasting of Montreal games was not permitted during the regular season schedule, leaving province of Quebec listeners without hockey until the play-offs. This winter, however, Imperial Oil Limited has secured a franchise for all Saturday night games in Montreal.

Knox United Church Notes.

Large congregations greeted the Rev. Dr. Sparling last Sunday which helped very considerably in creating a real inspiration. So successful were these services from a missionary point of view that we hope that we shall have further opportunities of hearing our missionaries who are on furlough.

The services next Sunday will be largely devoted to "Remembrance Day" thoughts, the sermon topic being, "Thy Kingdom Come." All are cordially invited to these services both in town and in the country. Please note the hours—Wescott, 11 a.m.; Westerdale, 3 p.m. and town, 7:30 p.m.

Three Alberta Bills Referred to Court

Final action of the federal government on Alberta's legislative efforts to regulate credit institutions, increase the tax on banks and exercise a measure of control over publication of news, will await the decision of the courts on the constitutionality of the measures.

An order in council passed and made public refers to the supreme court the question of competence of the legislature to enact the three bills passed at the last special session of the legislature.

Whatever the decision of the supreme court may be, it will be referred to the Privy Council for confirmation or otherwise.

Seven Acts Disallowed.

Since the Alberta government took office just over two years ago, seven of its bills have either been declared ultra vires by the courts or disallowed by the Dominion government.

In addition, two orders-in-council were declared invalid, while three bills have been referred to the Supreme Court of Canada for opinion as to their validity.

"Poppy Day" on Saturday

The people of the district will be asked to purchase a poppy on Saturday. Sale of poppies will, as usual, be made under the auspices of the local branch Canadian Legion. Proceeds of the sale are used in providing comforts for the disabled war veterans.

So buy a poppy in remembrance of the boys who gave their all in Flanders fields.

Carstairs Players Present Comedy

The Young People of the Carstairs United Church gave the comedy, "Plain Jane" in the Opera House on Tuesday evening, under the auspices of the Didsbury Band.

The presentation of the comedy by the amateurs was very well done and fully merited the applause they received from the audience. There was a fairly good attendance, but the play merited a larger audience.

Pool's Condensery May Be Mortgaged

Meeting recently at Alix, delegates to the Central Alberta Dairy Pool decided to float a \$100,000 debenture issue, the money to be used to clear off a debt of \$45,000 owing the bank, and the remaining \$55,000 to be distributed to members to cover 1936 dividends. In event of the debenture plan failing, efforts will be made to raise the \$45,000 by mortgaging the milk condensery at Red Deer.

The Pool, delegates decided, will departmentalize all units, and make each one responsible for its own operation.

Motions suggesting that the Red Deer condensery be closed and also the creameries at Bowden and Acme, were definitely defeated.

For Sale—Team of Clyde Mares, 7 and 10 years, broke, weight 1500. Apply to G. H. Sams, 3 miles north of the Bergen store. (441p)

Curlers Organize for Winter Sport

The annual meeting of the Curling Club was held Friday night when reports were received and officers elected. The financial report showed that the past season was one of the most successful in recent years. A vote of thanks was passed to the officers and to the committee in charge of the Curling Raffle.

Plans were made to repair the rink and have ice as quickly as possible. The executive were appointed to act as ice committee and engage a caretaker. J. A. McGhee and A. McNaughton will interview Rinks Ltd. in regards rent for the season.

All officers were re-elected by acclamation as follows: Honorary Patrons, A. G. Studer and W. G. Liesemer; president, J. A. McGhee; first vice president, T. Johnson; second vice president, A. McNaughton; Secretary, J. Halton; Chaplain, Rev. J. R. Geeson; Schedules, Dr. H. C. Liesemer and J. S. McCloy; Membership, W. MacFarquhar, C. E. Reiber and T. Johnson.

Dues were set at \$7.00 for old curlers, \$3.50 for green curlers and \$1.50 for ladies.

The Club will start the season with a president versus vice president competition, the losers to provide dinner. At this banquet the skips and rinks for the first schedule will be chosen, and other business preparatory to the season's activities will be dealt with.

Remembrance Day Service

The Canadian Legion will attend St. Cyprian's Anglican Church on Sunday, November 7th for their annual Remembrance Day Service. Rev. A. D. Currie will conduct the service. The public is invited to attend.

All members of the Legion and all returned soldiers are asked to parade at the Legion Hall not later than 2:30.

Junior Wheat Club Will Hold Fair

The Didsbury Junior Wheat Club will hold its first annual seed fair at the Leuzler Block on November 18th.

Mr. E. C. Hallman of the Dept. of Agriculture, Edmonton, will have charge of the fair. There are 25 members of the club who will exhibit.

NATURE SAYS CHEW!

KEEPS TEETH SPARKLING

Personality In Education

Too much stress cannot be laid upon the importance of the personality of the teacher as the chief integral factor in the educational systems of Western Canada if these systems are successfully to bear the burden which has been imposed upon them to lay the foundation of a virile and basically sound citizenry.

It is not enough that the teacher be erudite or that he or she be thoroughly grounded in principles of psychology and methodology. It is not even sufficient that the pedagogue, to use an old fashioned term, be an expert in the art of imparting knowledge to his or her charges. The teacher may have all these essential attributes and yet not have the personality necessary to inspire character, without which education is but a mere shell.

Personality has been defined as "that which constitutes distinction of person; distinctive personal character; individuality. Personality implies complex being or character having distinctive and persistent traits, among which reason, self-consciousness and self-activity are usually reckoned as essential" and Coleridge defined it as "individuality existing in itself but with a nature as a ground."

With these definitions as a background in the mind, the importance of personality in those who are charged, along with the parents, with the development of a future race which is as yet in the melting pot stage, can scarcely be exaggerated.

For it is axiomatic that as the twig is bent so will the tree become, and the twig will be bent as the teacher wills and directs it, consciously or unconsciously, and the determining factor in this process is the teacher's personality rather than his precept.

The success of the public school system of Great Britain is based upon the knowledge of the importance of this influence and the effect that the personality of the teacher will have upon the character of the pupils under his care. It is because of this that personality is regarded as the fundamental qualification, though not the only one, for headmastership in the great public schools of the old land.

Over there it is well known and recognized that the personality of the teacher will leave an ineradicable impress on the pupil, an imprint which will glow throughout life and will dominate thought, word and action until the closing scene.

And withal that is a natural sequence of submitting young and impressionable minds to the guidance of one individual for many hours a day in the formative period of youth.

Three important elements enter into the scheme of the education of youth. They are matter, method and personality. The first two have a relative importance in the educational structure, but without the last-mentioned, enduring results could only be insignificant, almost to the zero border.

Sometimes in the controversies which arise from time to time over the subjects which should be taught in the primary and secondary schools and the manner in which these subjects should be presented to the inquiring mind, the fact that the personality of the teacher and his influence on character building transcends the mechanics of education, is minimized or overlooked altogether. Of far greater importance to the future of the student and of the nation in which he will take his place, is what he will be, than what he will know or how he learned what he will know.

Good progress in this direction has been made in this country to date, despite the fact that the country is so young and has had to build up an educational system at short notice, and it is to be hoped that the distractions of economic and restless conditions will not be permitted to call a halt in the march towards this important objective and that as the primary objective it will not be forgotten.

In post-war years important strides were made in the educational systems of the country. Academic and professional standards were raised and other restrictions were imposed which, along with improved remuneration for teachers, served to make the teaching profession more attractive than it had been in the earlier days when it was used, more often than not, as a stepping stone to other spheres of work or to marriage.

In the more recent difficult years of drought and depression, however, the principal objective of custodians of the schoolhouse has necessarily been towards keeping the school open, all the time if possible, and if not, at least part of the school year. Makeshift measures have had to be adopted, but despite the handicaps imposed by strenuous conditions, in the great majority of instances, teachers, trustees and ratepayers have strained the utmost of their meagre resources in a valiant effort to live up to their obligations to the future generation.

During this period the teachers have in a substantial measure sacrificed a great deal to remain true to their trust and for their sakes as well as for the sake of the children it is to be hoped that the end of these difficulties lies in the immediate future and that ratepayers and parents will again be able to press further without serious encumbrance towards the goal that is so essential to the progress of the country—a well equipped schoolhouse and means to adequately recompense a teacher with a personality.

The accordion, smallest member of the organ family, produces the greatest volume of sound, for its size, of any musical instrument.

The ocean waters of the world contain about 25 trillion dollars' worth of gold in suspension, according to the estimates of scientists.

Might Prove Beneficial

Freak Will May Result In Modern Inheritance Bill

A husband who bequeathed his wife the equivalent of seven cents to purchase a noose, and added a hope she would make use of it without delay, may ultimately prove to be a benefactor.

The strange request at least has sent a group of parliamentarians into action to put an end to wills that disinherit wives and children.

Headed by Miss Eleanor Rathbone, independent member of Parliament for the combined English Universities, a delegation will wait upon Prime Minister Chamberlain to urge introduction of a modern inheritance bill.

For years members of Parliament representing all parties have sought to bring English law into line with legislation prevailing in Scotland and some of the dominions.

Proponents of a new inheritance bill declare incidents of eccentric bequests are all too frequent. Here are two cited:

A London man directed that his wife should be given "one pair of my trousers, free of duty and carriage paid, as a symbol of what she wanted to wear in my life-time—but did not."

Another left his widow the sum of one farthing to be sent her by post in an unstamped envelope. As the letter contained coin and was not registered, the woman had to pay a registration fee of eight pence in addition to two pence for excess postage.

USED TO WAKE UP WITH A HEADACHE

Now Fresh and Lively Every Morning

Here is a man who woke up every morning with a dull headache. Then Kruschen transformed his days. Read his letter:

"I used to wake up in the morning with a dull headache. A year ago, I started taking Kruschen Salts regularly. To-day, I wake up fresh and lively and can do my day's work without any exertion. I can recommend Kruschen for anyone suffering from headaches and constipation, and for putting new life into you. I intend to continue with Kruschen for the rest of my life."—E.P.

Headaches can nearly always be traced to a disordered stomach, and to the unsuspected retention in the system of stagnating waste material which poisons the blood. Remove these poisons—prevent them from forming again—and you'll never have to worry any more. And that is just how Kruschen Salts brings quick and lasting relief from headaches.

ALICE STEVENS' RECIPES

HOUSEHOLD HINTS

If your pulled candy seems at all sticky, roll the pieces in icing sugar. This prevents them sticking together.

When ripping an old woollen garment, wind the wool in skeins and wash to remove the curl in the wool. Bend your arm and wind the wool around your elbow and up to your hand. This makes a convenient sized skein and it is very easy to wind.

Whenever possible, cook apples without peeling them. The skin contains cellulose which is a valuable laxative.

Save the leaves of celery. Dry these slowly in the oven and save them for vegetable soup next winter.

Rayon is made from wood-pulp and softens in water. Great care must be exercised in washing rayon. Do not rub or wring the material as this puts it out of shape.

Add corn syrup to candy to prevent it going grainy.

Use very few spices and flavorings in cooking apples. Try to develop the natural flavor of the apples.

Store your jars of preserves away from the light, so that the fruit does not lose its color.

Avoid overloading the washing machine. A small quantity of clothes is cleaned more easily and there is less strain on the machine.

Treat your linoleum at regular intervals with wax, varnish or shellac. It is not only easier to keep the floors clean, but the linoleum wears much longer.

Serve a child or invalid two small servings rather than one large serving. They are much more apt to eat a large amount.

Readers are invited to write to Alice Stevens' Home Service for free advice on home cooking and household problems. Address letters to Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

Monkeys are relished by large eagles of the tropics.

Gifts For Royalty

Sent From Toronto To Queen Elizabeth And Her Daughters

The two beautiful embroidered purses for the Princesses Elizabeth and Margaret Rose, and chiffon handkerchief for Queen Elizabeth, which were the work of Mrs. S. Malloy, 131A Booth avenue, Toronto, and presented on her behalf by the Canadian National Exhibition, have been sent to Buckingham Palace.

The fine examples of Canadian needlework for the Queen and the Princesses were officially taken over by E. W. Scott, representative of the Canadian National Express, and sent to Montreal for shipment on the Duchess of Bedford. The package was addressed to G. H. Ward, Canadian National Exhibition representative, in London, who arranged for its delivery to the Royal Family.

The handkerchief for Queen Elizabeth is of pale rose, embroidered with the King George Carnation, the Scottish thistle, the Bowes-Lyon crest and the jewelled sceptre and crown. The little moire bags are of the latest design and are embroidered with the rose, thistle and shamrock, acorns, and oak and maple leaves. The one for Princess Elizabeth is more elaborate than that of Princess Margaret Rose and has a Royal Crown done in gold and jewel colors, whereas that of Princess Margaret Rose has a coronet.

Has Taken Many Years

To Shave Six Seconds Off The Mile Run Record

When Stanley Wooderson, a spindly English man clerk, smashed the world's record for the one mile run in London a short time ago he started a flock of armchair runners figuring out once more how soon it will be before someone runs the mile in four minutes flat. Wooderson's mile was made in four minutes, six and six-tenths seconds, which is just one-fifth of a second faster than the old mark held by Glenn Cunningham, of Kansas, the United States titleholder.

It has taken the great foot runners of the world just 22 years to shave six seconds off the mark. If they keep up the same rate of progress it will be around 1960 before we come down to the four-minute mark. Back in 1915 Norman Taber, of United States, held the world's mark at 4:12 3-5.—Winnipeg Free Press.

Cave Is Well Named

Mammoth Cave, Kentucky, has five levels, with 225 explored avenues, 47 domes, 23 pits, eight cataracts, three rivers, two lakes, and one sea. The actual space worked out of the limestone, according to estimates, embraces 12,000,000 cubic yards.

Great Britain reports a boom in recruiting for the territorial army.

WATCH OUT FOR YOUR LIVER!

And You'll Always Feel Great

Do you often say, "I feel rotten,"—tired out, no pep, hate to get up mornings, grouchy, nervous, constipated. The reason is a sick liver. A healthy liver does four things. It supplies the body's natural laxative, puts proper nourishment in your blood, helps the kidneys, intestines and stomach, supplies the body with energy. If it is unhealthy your system is poisoned and out of order. "Fruit-a-tives", made from fruit and herbal extracts, are the quickest, safest and most natural way of restoring your liver to health. A celebrated doctor's formula. Soon you feel like a new person. Try Fruit-a-tives. 25c., 50c. all druggists.

FRUIT-A-TIVES LIVER TABLETS

Treatment Of Sickness

Former Health Officer Of England Praises U.S. System

Sir Arthur Newsholme, former chief health officer of England and Wales, praised the free treatment of sickness as practised in the United States. He spoke at the 66th annual meeting of the American Public Health Association.

Sir Arthur said that from Shakespearean days, no impoverished person in his own country needed to suffer from lack of food, shelter or medical care.

Sir Arthur told of the work of the British National Health Insurance Act of 1907, which, he said, provides medical treatment for one-third of the total population of England and Wales.

Showmen Are Worried

Freaks For Country Fairs In Britain Are Scarce

Showmen of Britain who organize the countless fairs in country towns and villages are complaining of a shortage of freaks. They are seeking new ideas and were startled to learn at their annual meeting in London that there was a general scarcity of even the older variety of freaks. The chiefs of the fair industry are sending men to scour the country for attractions. In particular, there is a dearth of "India rubber men," those queer creatures who stretch their skin in sideshows.

Like Canadian Glue

Liquor dealer M. Robinson at Houston, Texas, wants Canada to change the formula of the glue it puts on liquor stamps. He said mice had licked the mullage from all Canadian stamps in his store, but had not molested the stamps of other countries. Other stores disclosed the same thing had happened to their Canadian stamps.

The Duke of Wellington was 46 years old at the battle of Waterloo; Blucher was 73.

British Scientists Point To The Dangers Arising From Unnecessary Noise

H. V. Thomas, writing in the Sunday Pictorial, vehemently decries the waste of efficiency, time and happiness caused by unnecessary noise.

Pointing out that the recent discussion of noise at the British Association is no new departure, the writer states that for the last six years half a dozen Boards of more or less importance and scores of bulging-browed scientists have been investigating the problem.

The Institute for the Deaf say that more than 3,000,000 people in the country suffer from defective hearing, and that, undoubtedly, noise has played a part in bringing this colossal figure up to its present strength. By noise is meant unnecessary or undesirable sound.

The National Physical Laboratory, which has been investigating the noise evil for several years, asserts that noise encourages nervous complaints and indubitably wastes energy.

Lord Horder, spokesman of the medical profession, says that noise wears down the human nervous system so that both the natural resistance to disease and the natural powers of recovery are lowered.

Professor Henry John Spooner puts it even more strongly by saying that the cost of noise in this country is probably £50,000,000 a year in human wastage.

Tests have proved that, in a noisy room, typists lost three per cent. speed and expend 13 per cent. extra energy; also that when noise was eliminated in a telephone exchange the mistakes of the staff were reduced immediately by 10 per cent.

More tests have shown that the output in the quiet parts of a factory was appreciably more than in the noisier quarters.

One can distrust isolated conclusions of this kind, but one is forced to respect evidence when it is repeated again and again.

Noise is probably the largest single brake on the wheels of industry to-day. And yet the writer does not think that this is its worst crime. Human efficiency may be important but human happiness is more important.

In industry and business, because money is at stake, something is gradually being done to abolish the noise nuisance. But in private life, because there are no boards to govern it, noise will go on as long as each man thinks that it's only the other fellow who is a nuisance.

And with more flats and more small houses, the output of hate will increase, while the output of neighborliness diminishes.

Unless, that is, the man in the street—and that means everybody—will co-operate with the scientists by seeking to reduce noise in private life.

One can see to it that one's radio is not loud enough to disturb the next-door's. One can be careful to close the car-door at night by the handle, one can avoid carpentry at night, one can talk quietly in restaurant, one can remember all the time that any kind of interference with another's pleasure is boorishness and that noise is the most frequent interference of all.

Noise, you say, never bothers you? It only worries nervous, overwrought people?

Well, what makes them nervous and overwrought?

Noise, as often as not. It'll get you yet, if you don't help to do something about it.

Millions In Paper Money

Summary Shows Large Sum In Hands Of Canadian Public

Hidden in teapots or under mattresses, carried about in pockets and purses or deposited in merchants' tills, more than \$200,000,000 in paper money is in the hands of the Canadian public, according to the September statistical summary of the Bank of Canada. The August average of note circulation, as distinguished from notes in banks, was \$203,000,000, higher than any time since the boom year of 1929, when it averaged \$205,000,000. In 1935 the total active note issued averaged \$169,000,000.

Trees In Kew Gardens

Many Of Historic Interest Are To Be Seen There

Kew Gardens, in London, have been having a little centenary. It is just 100 years since the structure known as King William's Temple was built on the rising ground on the opposite side of Pagoda Vista from the Limas. William IV., like his predecessor, George IV., did not take much interest in the gardens and this "temple" is almost the only thing at Kew to mark his reign. Close to the "temple" are the witch-hazels which will soon be displaying their curious golden-yellow flowers and here also may be seen two rare specimens of the so-called Tree of Heaven. Nearby are the honeysuckles and mulberries. One of the mulberries is directly descended from the tree that grew in Shakespeare's garden at Stratford-on-Avon. Another tree of interest in the gardens is Queen Elizabeth's elm. All that remains of it is to be seen at Brentford Ferry Gate. In her girlhood, when living at Richmond Palace, Queen Elizabeth used to walk by the river and sit beneath this once stately elm. Then there is a weeping willow on the bank of The Pond that was grown from a cutting taken from the tree that overhung Napoleon's grave at St. Helena.

Guarded Windsor Castle

Chief Of Fire Brigade Retiring After 30 Years Service

The man whose job it has been to protect one of the most valuable and historic buildings in the world for 30 years has just retired, reports the Overseas Daily Mail. He is Chief Officer Chadwick, of the Windsor Castle Fire Brigade. During all that time there has been no outbreaks of fire in the Castle. But there have been some "narrow squeaks." Owing to the immense value of the treasures in the State Rooms, none of the tapestries, jewels and works of art is insured. "It is impossible to say how many million pounds premium would be required," Mr. Chadwick said the other day. "The contents of the Royal library alone are worth several millions." The nearest approach to a serious outbreak was five years ago, when some Elizabethan timbers in the roof of one of the Canons' houses caught alight. If the brigade had not been on the spot with the latest appliances within a few minutes, the whole of the old cloisters might have gone.

The King's Gardeners

Like Other Landowners He Recruits Them From Scotland

Like many landowners in England, the King recruits his gardeners from Scotland, says the Glasgow Bulletin, which reports that His Majesty has appointed a Scotsman, Alexander MacKinnon, as manager of his farms at Sandringham, which will include the experimental flax farm King George V. started some years ago. It won't be Mr. MacKinnon's first experience of an English farm. For the past dozen years he has been manager for the King's father-in-law, Lord Strathmore, at St. Paul's, Waldenbury, the estate on which the Queen was born and spent so much of her childhood.

Toasting A Symbol

"The King" And "The President" Command Highest Respect

As to the President's jocular after-dinner remark in Victoria that on one occasion when toasting "The King" he did not know whether he was drinking the health of George VI. or Edward VIII., it is probably true that thousands of people in the United States who daily toast "The President" would rather lose a tooth than drink the health of Mr. Roosevelt. "The King" like "The President" is a symbol, demanding the highest respect, no matter who is the occupant of the throne or chair. —Ottawa Journal.

When in flight, hawks steer with their tails. 2225

Seed Growers' Assistance

Need Seed Purchasing Organization For This Purpose

Need for some permanent organization such as a seed purchasing commission to assist Canadian farmers through purchase of seed each year was emphasized before the Turgon Royal Grain Commission at Winnipeg by F. L. Dickinson, vice-president of the Canadian Seed Growers' Association.

Presenting the brief of his association, Mr. Dickinson said many seed growers have difficulty, especially in recent years, in financing their operations, more particularly during the period after threshing and until the seed is sold in the spring.

He requested the commission to consider the problem of the ability of seed growers to hold the high quality seed they have produced on their farms until it is required several months later for spring sowing.

"Each year thousands of bushels of this valuable seed is marketed through commercial channels and shipped out as grain because the seed growers cannot finance the holding of it until it is required later on," he said.

"The seed exchanges operated by some of the provinces have helped greatly but it is still a difficult matter for the growers with less than a carload of seed to secure the necessary financial assistance.

"There is a need for some permanent organization such as a seed purchasing commission to take care of these purchases of seed each year.

If this could be accomplished it would not only assist the seed growers but it would also help the farmers who need seed to obtain pure stocks of the varieties they require."

Pure seed is a necessary provision if Canada is to retain her present status in world grain markets, Mr. Dickinson said.

Butler Was Suspicious

Thought Henry Ford's Tools Might Be Burglar's Kit

The following story told by Henry Ford about himself is recounted by the Glasgow Bulletin. It concerns his visit to England when he and his wife were invited as week-end guests in a country house. The butler took possession of Ford's baggage and unpacked it in the room upstairs. When Ford went to his room, he noticed the butler eyeing him suspiciously. On the dressing table, neatly arranged, lay the set of mechanic's tools that Henry Ford always carries in one of his suitcases in case a desire to tinker with machinery should come over him. The butler, a very respectable person, knew nothing of Mr. Ford and his hobbies. But he had read his Edgar Wallace and thought he knew a first-class burglar's kit when he saw it. Throughout the entire stay at the country house, the butler made it his business to keep a close watch on Mr. Ford and his kit.

A milk bar, opened at an East Wemyss (Scotland) pit-head, is a big success. Miners drink 80 gallons daily.

Airplane Is Now Opening Up A New Mining Frontier In Northwest Territories

Chemically Treated Seeds

Originator Claims Method Will Change Agricultural Practices

A revolutionary change in agricultural practices through use of chemically-treated seeds was forecast by Howard D. Salins, Chicago, after harvesting of test fields of fibre flax and corn in Illinois and Wisconsin.

Salins, inventor of the process, said it is applicable to all forms of plant life.

Results of this year's tests proved to his satisfaction, Salins said, that fibre flax of quality equal to that of the best grown in Europe can be produced in North America from treated seed and that it afforded a highly profitable return to farmers. Little or no domestic fibre flax is grown now, although there is considerable seed flax.

Yields of corn from treated seed, he said, were 25 per cent. greater than yields from various kinds of untreated seed planted in adjacent fields this year. North of Merrill, Wis., where frosts limit the season to less than 90 days and corn is cut green for silage, a number of farmers, Salins said, grew corn to maturity from treated seed.

Reaction of the seed germ to the chemical, Salins said, gives the soil opportunity to facilitate fecundity. At the same time the treatment promotes growth of certain bacteria which replenishes the soil with those elements used as food by the growing plant, he said. Consequently, he added, use of fertilizer is unnecessary.

In addition to soil fertilization and increased yields, treated seed, he said, produces plants resistant to disease, pests, and variable unseasonable weather and which show marked ability to reach maturity in a shorter growing season.

In areas where yields of grain could be increased 25 per cent. through treated seed, Salins said grain acreage could be cut down and fibre flax substituted as a rotation cash crop.

Britons Like Canadian Eggs

Exports Not Large But Product Sells At A Premium

Canadian eggs are becoming increasingly important in the British breakfast. Agriculture Department officials predicted shipments to Great Britain this fall would be 1,250,000 dozen, a 37 per cent. increase from 912,000 dozen last year.

The export season is from mid-September to the end of November. Up to October 2 270,000 dozen had been shipped.

Although exports to Great Britain are not large, in comparison with those to other countries, Canadian eggs sell at a premium there. Saskatchewan, Manitoba and Ontario are the chief exporting provinces.

Just as the covered wagon and pack train of pioneer days carried the tide of civilization westward on the North American continent, so the airplane of to-day is opening up a new mining frontier in the Canadian Northwest Territories. Long regarded only as a region of ice and snow, this vast expanse, which embraces more than one-third of all Canada, is now destined to play an important role in the economic life of the Dominion due to the introduction of aerial transportation. Many areas once almost inaccessible are now within a few hours' flying time from large centres of population, and regions rich in minerals of economic importance—radium, copper, nickel, gold, lead, zinc and silver—await the prospector.

The year 1929 was the turning point in the affairs of the Northwest Territories, when mineral-exploration companies demonstrated that the airplane could be used to advantage in these northern latitudes. The range of the prospector's activities had previously been restricted mainly to lands in close proximity to rivers and lakes, and little was known of the country back from navigable waters. With the advent of aerial transportation the movement of the prospector became more widespread and the necessity arose for maps far more detailed than those then available. By resorting to the airplane and the modern science of map-making, including aerial photography, topographical and geological mapping were speeded up. In 1930 and 1931, an area of 11,000 square miles to the east of Great Bear Lake was photographed, and, last year, to give the most recent example, an area of 17,500 square miles to the east of Yellowknife River.

Previous to 1929 the principal mineral developments in the Northwest Territories were the location and partial development of lead-zinc deposits near Pine Point, Great Slave Lake, and the discovery of oil at a point about fifty miles below Norman on the Mackenzie River, where there are now two producing wells. As a result of aerial explorations carried out in 1929 copper-sulphide deposits were discovered in the area between Great Bear Lake and the Coppermine River, and this was followed by the notable discovery of pitchblende-silver deposits, from which radium is obtained, at LaBine Point, on the eastern side of Great Bear Lake, in May, 1930. In 1935 gold was discovered near the mouth of Yellowknife River and on Outpost Island, and also in the vicinity of Taltson River on the south shore of Great Slave Lake. In the fall of 1936 a gold strike was reported at Gordon Lake, 50 miles northeast of Yellowknife Bay, which seems likely to rank as one of the most important finds in recent years. A nickel and cobalt-bearing mineral deposit has been located a few miles east of the point where the Francois River enters the eastern arm of Great Slave Lake, and a nickel deposit has also been discovered and staked on the north shore of Rankin Inlet on the west coast of Hudson Bay.

According to recent reports Canada's northern mineral front continues to be the scene of great activity, and aerial transportation companies are busily engaged in carrying freight, supplies, and men to remote areas. In most of the mining country of the North there are numerous lakes which provide suitable landing for aircraft with floats in summer and with skis in winter.

New Glass Discovered

Is Transparent To Light But Will Shut Out Heat

Production of a glass that shuts out heat is promised in Prague, Czechoslovakia, as the result of a discovery of a Bohemian inventor. The glass is opaque, or nearly opaque, to heat. While it is transparent to light it can be used to exclude heat. Light waves and heat waves do not differ in kind but in wavelength, and it is said the inventor has found out how to prevent heat waves from passing through the glass.

These Kittens Are Fun To Stitch

Household Arts by Alice Brooks

Simple Embroidery Makes Appealing Picture or Pillow

PATTERN 5719

These kittens will come without much coaxing—they're entirely in single and outline stitch and you know what little work that is—use them on a picture or pillow. You can see what impressive gifts they'd make especially if done in wool. Color chart and key are given in the pattern. In pattern 5719 you will find a transfer pattern of a kitten 7 x 9 inches and one 8 x 9 inches; illustrations of all stitches used; material requirements; color suggestions.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

The World of Wheat.

By H. G. L. STRANGE

"What is the reason No. 3 Northern is at such a discount in price, compared with No. 1 and No. 2?" friends ask me.

"There is a misunderstanding here," I answered. "No. 3 Northern, far from being at a discount, is actually selling at quite a premium on world's markets, as compared with wheats of equal quality."

On the Liverpool market No. 3 Northern is commanding 5½ cents over Australian, 11 cents over Indian, 16 cents over American Hard Red Winters, and 16 cents over Argentine wheats; demonstrating that No. 3 Northern is definitely at a premium.

We are confused, however, by the much higher premiums that are bid on world's markets for No. 1 and No. 2 Northern, the reason being that No. 1 and No. 2 are much more scarce than No. 3.

Actually, therefore, we see in front of us a revealing moving-picture of the law of supply and demand in action through the medium of the open "futures" market. We see three scarce articles with eager bidding for them by Canadian and British millers, all resulting in a benefit to our producers.

The different premiums for 1, 2 and 3 Northern paid on world's markets are reflected straight back to our Canadian producers in the prices offered at country elevators.

Following factors have tended to raise price: Rate of world shipments in excess of Broomhall's estimate -- Germany, England actively buy Argentine corn -- Conflict in the East becomes more serious -- Japanese rice crop smaller than last year -- Signs of black rust in Argentina -- Flooding causes crop deterioration in Italy.

Following factors have tended to lower price: Australian wheat crop larger than last year -- Competition from cheap Danubian wheat -- Canada importing South African corn -- Business reversal in U.S.A. -- German potato crop largest on record -- Manchurian soy bean crop above last year -- Rains improve Argentine crop prospects.

Radio, Screen and Stage Stars in "Big Broadcast"

A dozen big time radio entertainers in addition to a strong line-up of screen and stage talent has been assembled to make "The Big Broadcast of 1937," which comes to the Opera House this weekend, the most lavish production of its kind.

With Jack Benny, George Burns and Gracie Allen, Bob Burns, Martha Raye, Benny Goodman and his Swing Orchestra, and Leopold Stokowski at his Symphony Orchestra heading the list of radio headliners, and Shirley Ross, Ray Milland, Frank Forest, Eleanor Whitney representing Hollywood, "The Big Broadcast of 1937" is an all star attraction whose individual performers have following into the millions.

FREE MATINEE SATURDAY for the Boys and Girls, at the Opera House. "Peurod and Sam."

Melvin Notes.

Mr. and Mrs. August Krebe visited Mr. and Mrs. Ace Essler at Bircham over the weekend and accompanied by Mr. Chas. Fose, they attended Mr. Roy Shaw's sale at Vulcan on Tuesday.

Mr. and Mrs. Eddie Krebe and Mr. and Mrs. Emil Krebe visited the southern city on Tuesday.

Mr. Jack Hendry, his sister, his mother, Mrs. Rob't Hendry, and Ray Cox of High Prairie visited with Mr. and Mrs. Carlson on Monday.

Mr. G. Carlson left on Monday or a short visit to Winnipeg.

Miss Sally Dugan of Bergen spent a few days at the Johnston home.

Don't forget the Dance at Melvin Community Hall, Friday, Nov. 6th.

Miss Ethel Broadhurst who spent a week with Mrs. C. Youngs, returned home on Saturday.

Mountain View Notes

Mr. and Mrs. T. Towers were visitors in the district last Tuesday.

We are pleased to report that Mr. Finley is steadily improving in health.

Mr and Mrs. Blanchard and Dennis, of Calgary, spent Sunday with friends in the community.

Members and friends of Mountain View W.I. met for the October meeting at the present home of Mrs. Earnest Tighe. Roll-call was answered by naming an economizing menu. After a short business session Mrs. A.M. Coates gave a good paper on "Household Economics." The November meeting will be held at Community Hall, when members are requested to bring lunch.

Over \$40,000,000 worth of Western Farm Products poured into the East last year

In steady work, the industrial employee maintains a high standard of living. His appetite for Prairie Province foodstuffs is insatiable. He and his family are one of the reasons why over \$40,000,000.00 worth of Western farm products found a market in the East last year.

Over \$40,000,000.00 is a lot of money: it's a sum that means much to the Western producer, collectively and individually. It went, generously, to every type of farmer.

For instance, those specializing in live stock, took in over \$15,000,000.00 for

127,000 tons of fresh and cured dressed meat, 175,705 head of cattle, 21,144 calves and 41,557 hogs shipped to the East. Nearly 10,000 tons of butter brought in \$4,500,000.00 more, while grains, poultry, eggs, honey and other commodities accounted for an additional aggregate of well over \$20,000,000.00.

That is why a prosperous industrial East means a prosperous agricultural West: for more and busier Eastern workers mean a greater demand on their Western commissary. Your purchase of a Made-in-Canada car helps towards this end.

There are 18,000 workers in Canada's automobile plants, and 15,000 employed in the 202 parts manufacturers' plants. An average of four to a family means over 130,000 people whose prosperity depends in whole or in part on the activities of the motor car builders. Add as well, the employees of railways who live by traffic and you have a huge cross-section of Eastern Canada—a group of people who contributed much of the \$40,000,000 spent last year for Western farm products.

For statistical and further information about this industry, write to Automotive Industries, 1006 Lumsden Building, Toronto.

Notes From the West

Mrs. Al McInnis spent the week-end in Didsbury.

Mr. and Mrs. D. Evans and family were Sunday dinner guests of Mr. and Mrs. P. Hosegood.

Mr. and Mrs. A. Orde, Mrs. McDonald and Mr. John Walder were weekend visitors in Calgary.

Miss Gladys Sayres was a guest at the McInnis home last week.

Miss Margaret Luft returned home after spending last month in Didsbury with her sister, Mrs. Joe Dyck.

At a school meeting held Monday afternoon Mrs. Evans was appointed secretary-treasurer in place of Mrs. Dobson, who had held the office for the past ten years.

Mrs. A. Hogg entertained at cards in honor of Mrs. Dobson and Tom on Tuesday evening, the honors going to Mrs. P. Hosegood and Mr. I. Hosegood. Consolations were won by Mrs. E. Lowrie and Mr. Richard Haener.

Thursday afternoon Mrs. Evans entertained in honor of Mrs. Dobson. Dish towels and potholders were made and presented to the departing guest. Mrs. Arnold Blain got first prize for the neatest dish towel, and Mrs. Richard Haener first for the potholder.

CARD OF THANKS

I wish to thank all those kind friends and neighbors for their help and sympathy during the illness and death of my mother.

Mrs. R. D. SMITH

Social Credit Will Hold Convention

A Social Credit convention for the Didsbury constituency is announced to be held in the Didsbury Opera House on Wednesday, November 9.

The convention will be in the afternoon commencing at 2 p.m. when delegates from each zone in the constituency will be in attendance.

In the evening, a mass meeting will be held when the Hon. Lucien Maynard, Minister of Municipal Affairs, E. P. Foster, M.L.A., and others will address the meeting.

Westcott Notes

Westcott W.I. met at the home of Mrs. Wilfred Owens on Thursday October 28th, with thirteen members and three visitors present. Roll-call was answered by the members naming their favorite salad and why they liked it.

After correspondence had been attended to, plans for the annual bazaar, which is to be held Friday evening, November 19th at 8:30, were completed. The program will take the form of an "Amateur Night." Phone your entries to R910 Didsbury or R1105 Carstairs. Cash prizes will be awarded in the different classes. Fish pond for the children.

A contest consisted of each member drawing an old witch riding a broom, Mrs. C. Ray drawing the best one.

The meeting closed and lunch was served by the hostess. The November meeting will be held at the home of Mrs. Harry Levagood.

TWENTY YEARS AGO.

Twenty years ago two farmers' grain companies serving Alberta farmers were amalgamated to form United Grain Growers Limited.

The twenty years that have passed have increased the confidence of farmers in this farmer-owned institution. Satisfactory experience in the handling of their grain is the basis of that confidence.

Dominion of Canada 1937 Refunding Loan

The Bank of Canada is authorized by the Minister of Finance to Receive Subscriptions for this Loan, to be issued as follows:

One and One-Half Year 1% Bonds, due June 1, 1939

Issue price: 99.125% and accrued interest,
Yielding approximately 1.59% to maturity

AND

Seven Year 2½% Bonds, due November 15, 1944

Issue price: 98.50% and accrued interest,
Yielding approximately 2.74% to maturity

AND

Fourteen Year 3¼% Bonds, due November 15, 1951

Callable on or after November 15, 1948

Issue price: 99.00% and accrued interest,
Yielding approximately 3.34% to maturity

The 1% Bonds will be dated December 1, 1937. The 2½% Bonds and the 3¼% Bonds will be dated November 15, 1937. Principal and interest will be payable in lawful money of Canada. Interest will be payable without charge, semi-annually, at any branch in Canada of any Chartered Bank.

1% Bonds \$1,000
Denominations: 2½% Bonds \$1,000
3¼% Bonds, \$100, \$500 and \$1,000

Proceeds of this loan will be used for refunding, in part, the outstanding total of \$122,799,800 on converted Dominion of Canada 5½% Victory Loan Bonds maturing December 1, 1937. The additional cash required for this purpose will be provided from the Treasury.

Payment is to be made in full against delivery of interim certificates on or about November 15, 1937, in the case of the 2½% Bonds and the 3¼% Bonds, and on or about December 1, 1937, in the case of the 1% Bonds.

5½% VICTORY LOAN BONDS DUE DECEMBER 1, 1937 (WITH FINAL COUPON DETACHED) will be accepted at par up to the amount required for payment of allotments of the new bonds. Resultant cash adjustments, where necessary, will be made at the time of delivery.

Subscriptions may be made to the Head Office of the Bank of Canada, through any branch in Canada of any Chartered Bank or through any recognized dealer, from whom copies of the Official Prospectus containing complete details of the loan may be obtained. The Minister of Finance reserves the right to allot subscriptions in full or in part.

The subscription lists will open November 3, 1937, and will close as to any or all of the maturities, with or without notice, at the discretion of the Minister of Finance.

PLUG SMOKING TOBACCO

WORLD HAPPENINGS BRIEFLY TOLD

Lieut. William Ronald Harley of the Royal Air Force was killed when his plane crashed into Moray Firth during naval manoeuvres off the northeastern Scottish coast.

Jerry Ambler, Calgary cowboy, won the bronk saddle riding contest on "Tea Trader" at the 12th annual world championship rodeo at Madison Square Garden, New York.

Soviet Russia announced its first direct secret election of a national legislative body will be held Dec. 12 when a new supreme Soviet will be named.

Commander S. D. A. Grey, London, 48, wartime flyer called "Daredevil Grey," fell to his death from a ninth floor window when fixing a radio aerial.

General Erhard Milch, secretary of state in the German air ministry, declared France's military aviation ranks among the finest in the world, after witnessing French aerial units in action at Rheims.

It is understood one battalion will be added to each of the three regiments of the territorial army in Northern Ireland—the Inniskilling Fusiliers, the Irish Fusiliers and the Ulster Rifles.

Canada will have a pavilion at the 1938 Scottish Empire Exhibition at Glasgow with a ground floor area of 24,000 square feet, Mayor James G. Parmelee, deputy minister of trade and commerce, said after returning from Europe.

Ramsay MacDonald, back in London after a long holiday in Scotland, recently observed his 71st birthday. Physicians have counselled the former prime minister against resuming work too early after his long period of poor health.

The Greatest Danger

Good Straight Road Seems To Be Temptation To Drivers

When you examine 700 highway accidents and find that 255 of them occurred on straight-away stretches, and only 125 at admittedly dangerous curves, you do not have to go far to find the only possible explanation, which is excessive speed. Barring a few plain lunatics, the very great majority of drivers take such hazards as bad curves, hill crests, etc., with a certain degree of caution. But the wide-open modern road, properly surfaced, marked and banked, is too much of a temptation for a multitude of people who are in too much of a hurry even to think. That is why the majority of accidents happen where there is least excuse for them.—Montreal Star.

Although coyotes choose special places to met and yelp their weird songs, they never use the same meeting place twice in succession.

Medical Smoke Test

Soft Coal Smoke In Cities Said To Be Weight Reducer

The soft coal smoke of cities is a weight reducer, an ally of pneumonia and bronchitis and a cause of fibrosis in the lungs.

This medical report was published in the American Journal of Public Health in connection with the 66th annual meeting of the American Public Health Association.

The medical smoke test, for the first time, separated the effects of the three common fuels, bituminous, anthracite and coke. Little harm was found in anthracite and coke.

The study was made on rats, mice and rabbits by Lucy Schnurer, M.D., of the Allegheny General Hospital. The animals lived in chambers containing smoke in the same proportions breathed by humans, but the concentration was higher and more constant. Compared with other animals living in smoke free chambers, the rats in the anthracite air gained five per cent. more in weight. In coke air the rats gained 14 per cent. In bituminous smoke their weight gain was 25 per cent. less than the control animals.

This however, did not mean that coke and anthracite are sure to cause more weight. For rabbits slowed their weight increase in all three kinds of smoky air. Far the worst for them was soft coal, which cut them down by 91 per cent.

The largest numbers of uncomplicated pneumonias and of cases of bronchitis appeared in the animals in soft coal smoke.

Wealthy Man's Benefactions

Lord Nuffield Gives Large Sums To Worthy Causes In England

Lord Nuffield has announced a second gift of £300,000 (\$1,490,000) to the Radcliffe infirmary at Oxford.

Lord Nuffield previously had given £150,000 to the hospital. The second donation is in the form of an endowment fund, the income from which is designed to raise the standard of the infirmary's services.

Recently it was announced the motor car manufacturer had donated £50,000 to the rebuilding fund of the hospital for sick children in London and £15,000 to the Princess Elizabeth orthopaedic hospital, Exeter.

The philanthropist's benefactions in the last 11 years total some £8,000,000, including a gift of £2,000,000 to Oxford University for endowment of a post-graduate school of medical research and £2,000,000 for relief of the distressed areas.

Returning To Oxford

The Hon. Alastair Buchan, who has been visiting his parents, Their Excellencies the Governor-General and the Lady Tweedsmuir for the past few months, sailed in the Duchess of York from Montreal for England. Mr. Buchan will return to Oxford University to resume his studies.

A Ten-Minute Warning

All Londoners Would Have In Event Of Air Attack

The civilian population of London would receive only ten minutes actual warning of an air attack, in the event of war, before the invading aircraft reached their objective. Major H. Stuart Blackmore, Chief Medical Officer of the Air Raids Precautions Department, British Home Office, made this statement at the Sanitary Inspectors' Conference at Brighton. He added that the network of observation posts being constructed all over the country would enable a preliminary warning of something like 20 minutes to be given. But the warning would not be specific—it would only be a general warning to an area to get "on its toes." The actual warning of the imminence of attack was bound to be much shorter than that, and it was possible that at the outside it was likely to be ten minutes.

Might Be Good Idea

Official Of Syracuse University Thinks Governments Should Advertise More

Governments should advertise more, William E. Mosher, director of the school of citizenship and public affairs, Syracuse University, told the civil service assembly of the United States and Canada in Ottawa.

"There is a dearth of interpreting to the public what the government is doing," Mosher said. "Public authorities are almost entirely lacking in appreciation of the necessity of informing the public of plans or accomplishments."

Government authorities should consult large advertisers, the Syracuse professor suggested. They could find out how toothpaste and powder were sold and "a lot could be learned from those boys."

SPICE UP VERSATILE TAILORED FROCK WITH GAY COLLAR-VESTTEE OR SCARF

By Anne Adams

A frock you'll really "live in"—this bound-to-be-admired stylester, and it's from a pattern so easy to make, that you won't rest until you've at least two different versions in your wardrobe. Business or "home" girl will be delighted with the versatility of Pattern 4524, for whether you wear it with dashing, contrasting collar-vesttee 'n' cuffs or tuck in a jaunty scarf at the neckline, this Anne Adams model is in perfect taste at all times! Wouldn't you like your version in wool or synthetic?

Pattern 4524 is available in misses' and women's sizes 14, 16, 18, 20, 32, 34, 36, 38, 40, 42 and 44. Size 16 takes 2 3/4 yards 54 inch fabric and 1 yard 39 inch contrasting fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

The male sea horse carries eggs of the young in a special pouch.

Business And Public Affairs

Lord Tweedsmuir Foresees Changes For The Future

Development of government-controlled but privately-managed institutions bordering on the form of public utilities was foreseen on an increasing scale by Lord Tweedsmuir in an address before Montreal junior board of trade.

"We shall increasingly have what you might call public utilities corporations under government control and managed executive by private citizens," he said. "In England you have examples of this in the central electricity board, the Port of London authority and the British Broadcasting Corporation. And I feel that that expedient is destined to be increasingly followed in the future. It must be if we are to have a really effective administration."

Speaking to the board of trade members on the relation of business to public affairs, His Excellency said the relation was "closer than ever before. Public affairs mean a great deal to business men since there is no department of life the government does not enter."

Political knowledge in the past was in the hands of a highly expert but small number of men, he said. The ordinary man know little of such things. But to-day "there are so many expert departments they cannot be entrusted to small numbers. Government must devolve on a large number of experts. Not on royal commissions but on men who do actual executive work, because many matters of national concern are business matters."

Business and public affairs were intricately interwoven and it was no use "pretending we could seclude ourselves, as our grandfathers did, by saying 'we don't bother about public affairs.'"

Learning Figure Skating

Princess Elizabeth Is Resuming Her Lessons In London

Since the Court returned to London, Princess Elizabeth has resumed her skating lessons at a well-known ice-rink, and is likely to be accompanied by Princess Margaret. Princess Elizabeth began her lessons last season and made remarkable progress. So far, she has learnt only the straightforward movements, but she has been promised attempts at figure-skating, and also the waltz on the ice. The King and the Queen have never tried artificial ice-rink skating, but a few years ago, when the weather provided frozen ponds and lakes in England, their Majesties skated both at Virginia Water and at Buckingham Palace.

A Remarkable Machine

Examination Papers Of Georgia University Graded By Robot

Rob the Robot has just completed flawless grading of 20,000 freshman placement examinations for Georgia's University system.

Rob is a mechanical professor perfected by a national machine company and educational foundations. During ten days, he took the examination papers from all the schools in the state's university system, absorbed them in toto and reassembled them in piles along with the score.

The robot works by electricity, "reading" pencil marks on standard test forms of the true-false or selective question variety. During the 10 days, said F. S. Beers, university examiner, this monster accomplished work which formerly required the combined two weeks' efforts of some 200 persons throughout the state.

Here is how the cold-hearted grading machine works:

The examination paper, on which the freshman has penciled his "X" mark in either a "yes" or a "no" column, is inserted in the machine. Electrode blades inside Rob descend on the paper and record the position of the mark. The blade then relays an electric impulse to a recording meter which adds up, calculates and registers the grade.

Loses Bark But Keeps Bite

Karlruhe Gretel, Buffalo's barkless dog, is in the doghouse again. This time the 4-year-old Doberman Pinscher is charged with biting and will be kept under observation to see if she has rabies. The dog whose bark led to snipping her vocal cords, has been doing all her talking in a tiny squeak since last December.

Treatment Of Cancer No. 2

The wise surgeon does not depend on his art alone in the treatment of cancer. In appropriate cases he employs the auxiliary measures of X-ray and radium. In an ever-increasing number of cancers the treatment is a combination of all three methods. In all cases early treatment is essential to success. Neglected cancer is invariably and inevitably fatal.

Forty-two years ago a German professor in the University of Wurzburg, Bavaria, discovered a new kind of ray of light while engaged in his experiments. This ray, known as the X, or Roentgen ray, has the power of penetrating most substances, of leaving the shadow of a dense object on a photographic plate, of bringing about chemical reactions and of producing changes in living matter.

The X-rays are generated by passing a current of high potential (electricity) through a vacuum tube (Coolidge tube), that is a tube of special character from which the air has been removed. These rays are used in the taking of photographs of various parts of the body, such as pictures of bones, of foreign bodies such as bullets or calculi. By means of X-rays the functions of such organs as the heart, lungs, stomach, intestines, etc., may be examined. They are used in treating conditions such as lupus, eczema, cancer and many others.

The X-rays are very powerful. They will pass through cardboard, cloth and wood with ease. They will penetrate a thick plank or a book of 2,000 pages. But metals such as iron, copper, lead, silver and gold are less penetrable, the densest of them being fairly opaque. White flesh is very transparent to the rays; bones are rather opaque, and one may see the bones of one's hand if the latter is interposed between the source of the rays and a screen.

Cancers accessible to the effects of X-rays are destroyed by them, the effect being similar to that produced by the rays of radium. The dose can be accurately measured. In some cases a large dose is used; in others the total dose is divided over a period of weeks, fractionated, it is called. Needless to say, skill and experience are quite as necessary in the handling of X-rays as in surgery. The X-rays are dangerous in unskilled hands; they are quite safe when used by the experienced radiologist.

Next article: Treatment of Cancer No. 3.

Look Up Your Ancestors

Professor At Nebraska University Has Figured Out Some News

If you are 40 years old and Dr. J. O. Hertzler, of the sociology department at Nebraska University, is right, you may have had 18 ancestors who were grownups during the Revolutionary War, 512 who flourished when the Mayflower came over, 524,288 who were walking the Earth when King John signed the Great Charter, and more than eight million (without allowing too much for duplications) who were contemporaries of William the Conqueror. Isn't genealogy grand!—Detroit Free Press.

A list of awards to movie personages since 1921 shows Walt Disney the most frequently remembered. It was Mr. Disney, you recall, who invented a better mouse.

WHAT HO!

By RICHARD CONNELL.

By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER I.

"Pop, 10,001," remarked the last census, speaking of Bear Falls, which nestles, surrounded by tall corn and plump pigs, in the midriff of Iowa.

Ten thousand of those who lived, moved and had their being there, were the usual More-or-Lessers. They were more or less prosperous, more or less virtuous. They possessed more or less intelligence, beauty and charm and were more or less happy, more or less sad. They had the standard quota of health and hope, the usual stock of assorted dreams and desires. So much for the ten thousand. The odd one was Ernest Bingley.

If, by design or mistake, you chanced to be in Bear Falls, you might not have been able to tell its Main street from the chief thoroughfare of Bellows Falls, Vermont, or Klamath Falls, Oregon. It was lined with the familiar facades, peopled with the familiar faces. One shop alone was unique. It was a small, neat establishment, with a leaded glass bow-window. It was sandwiched in between the Bijou-Dream Movie Theatre (Bank Nite Thursday), and the opulent Elite Bootery conducted by Mr. Caleb Slocum. It flaunted no garish signs, but bore a small brass plate with the legend

IVANHOE PET SHOP AND TAXIDERMIST
Ernest Bingley, Sole Prop.

On a fair and tingling fall day the sole prop. was practicing his art in the room at the rear of his premises which he called his studio. A blue chest of drawers and an iron cot suggested that it was also his living quarters. The curious mid-west sun, perching through the wide north-light window beheld a scene which was a blend of jungle, zoo, and rummage sale. Rows of birds, ranging in size from canaries to geese, stared down from shelves with impassive eyes. In one corner a bear-cub was essaying to climb a papier-mache tree. He would never make it, poor cub, but was destined to remain forever, Tantalus-like, half way to his goal, until the moths got him. In another corner, a placid pug dog reclined serenely on a wooden pillow, unperturbed by the fact that a family of wildcats, father, mother and daughter, crouched not a foot from his nostrils. On stretchers were the hides of various animals. A bodiless moose leered amiably from the wall. About the place were strewn odd bits and pieces of creatures feathery, furry and piscatorial, the head of a hawk, the skeleton of a sunfish, the skin and fleece of a lamb which would gambol no more in some green Iowa pasture.

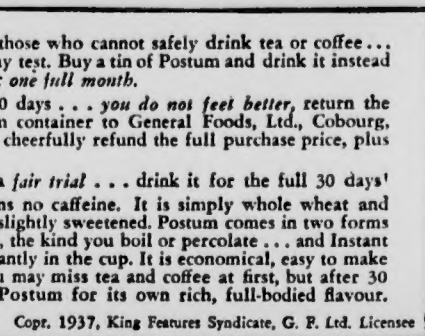

With a piece of chamois Ernest Bingley deftly polished a surprisingly life-like glass eye and backed off to survey, critically, his masterpiece to date.

It was a horse, a tall, able-bodied, handsome horse, so cunningly mounted that he seemed to be charging, full gallop, at some invisible barrier. Ernest gave a little sigh of satisfaction. No connoisseur of stuffed horses could, he felt, cavil at his handiwork.

He patted the horse's muscular neck.

"Easy, boy, easy," he said.

Moved by some sudden fancy, he began, inexpertly, to clamber up on the broad back of the stationary steed. But just as he settled into the phantom saddle and gathered up the imaginary reins, a second notion struck him, and he dismounted. He

YOUR MONEY BACK
IF SWITCHING TO
POSTUM
DOESN'T HELP YOU!

If you are one of those who cannot safely drink tea or coffee... try Postum's 30-day test. Buy a tin of Postum and drink it instead of tea or coffee for one full month.

If... after 30 days... you do not feel better, return the top of the Postum container to General Foods, Ltd., Cobourg, Ont., and we will cheerfully refund the full purchase price, plus postage!

Give Postum a fair trial... drink it for the full 30 days!

Postum contains no caffeine. It is simply whole wheat and bran, roasted and slightly sweetened. Postum comes in two forms... Postum Cereal, the kind you boil or percolate... and Instant Postum, made instantly in the cup. It is economical, easy to make and delicious. You may miss tea and coffee at first, but after 30 days, you'll love Postum for its own rich, full-bodied flavour.

Copyright, 1937, King Features Syndicate, G. F. Ltd. Licensee

shucked off a stained and rumpled smock, and donned, as more appropriate, a well-worn henna-hued tweed coat. His eye lighted on a bamboo fish-pole dusty from disuse. This he seized and again he mounted the horse.

Grasping the pole in his right hand he pointed it straight ahead, like a lance, roweled the flanks of his charger, with unseens spurs, and cried, in ringing, defiant tones,

"What ho, varlet! Have at you, Sir Brian duBois Gilbert! You'll rue the day you dared cross lances with a Bingley."

His jousting was interrupted by a sound behind him. He whipped his eyes around and saw, in the doorway, a brief, paunchy man, goggling at him, pop-eyed.

"Oh, hello, Mr. Slocum," said Ernest, and the pink on his neck did not come from the sunset.

"Snakes alive, Ernie, what's got into you now?" demanded Mr. Slocum.

"Well, you see," explained Ernest, "he looks so life-like, I sort of thought I'd take a ride--"

Mr. Slocum wagged a disapproving toupee.

"Do you want folks to think you got hoot-owls in your attic?" he inquired.

"No," said Ernest. "I don't."

"Well, if anybody saw you fishing and hollering on a dead horse they might think you didn't have all your buttons," stated Mr. Slocum.

"I guess some people think that already," said Ernest Bingley.

"So they do, Ernie, so they do," returned Mr. Slocum cheerfully. "Well, I can't stay away from my store very long. Got your camera ready?"

"Yes. There it is, on the work bench, under that porcupine."

"How do you want me to take you?" queried Mr. Slocum, as he gingerly untangled the camera from the porcupine.

"Just like this," said Ernest, from the horse.

"Pole and all?"

"No." The pole clattered to the floor. Ernest sat erect, his arms folded across his chest, and a stern, equestrian look in his hazel eyes.

"Shoot," he said.

"Well," observed Mr. Slocum, as he aimed the camera and squinted along its sights, "I'm only doing this to help out a neighbor, but if I was a young businessman, trying to win trade, I wouldn't go round having my picture taken on stuffed horses. In business you always got to ask: What will the customer think?"

"Mine will think it is a real horse," said Ernest, and added, "I hope."

"Click!" went the camera shutter.

"Of course," went on Ernest, "I'll tell them the truth. When they see what a natural job I made out of

Tartar maybe I'll get more orders. I need 'em."

"I can't deny," said Mr. Slocum, "that Tartar looks real enough to eat oats; but I doubt if you'll ever get rich stuffing horses in this part of Iowa. They'll never be a popular number around here. Too unhandy. Just what is Otis Wyncoop going to do with this critter, now that he has him?"

"Mr. Wyncoop plans to keep him in his den, I understand," said Ernest. "Tartar was his favorite hunter, you know."

Mr. Slocum emitted a faintly equine snort.

"Hunter!" he exclaimed. "If that don't beat all get-out! Say, when I first knew Ote Wyncoop the only hunting he ever did was for jobs. And that wife of his! Why, say, Ernie, many's the time, twenty, twenty-one years ago she served me an order of ham and down at the America House. Armina Dietz she was then and so fresh from the farm she threw a fit the first time she saw a trolley-car. And now you can blister me from top to bottom if she doesn't sail past my store, all minked up and her snoot in the air, to go to Chicago to buy her shoes. Is that civic? I ask you."

"It must be fun to be rich," said Ernest.

"Well," said Mr. Slocum, "if I was a millionaire and had made my money in sausages I'd never have a stuffed horse in my den. It might give folks ideas."

"If I was rich, I'd travel," said Ernest.

"What for?" demanded Mr. Slocum. "You've been to Kansas City, haven't you?"

"Once."

"Well, if you've seen one big town, you've seen 'em all," said Mr. Slocum.

"I want to go to England," said Ernest.

The owner of the Elite Bootery pursed his lips and made a "Tck, tck, tck" sound.

"Maybe they're right," he said. "Maybe you are a bit touched upstairs. How long have you had this nutty idea, Ernie?"

Ernest Bingley colored as a man does when some secret dream is touched.

IN UP-TO-DATE STABLES

—Old Reliable Minard's

When horses come in to stable with wire-cuts or saddle boils, or cows have caked udder, the thing to do is get the Minard's bottle at once, as Mr. Dowd of Glenboro, Manitoba, knows. He writes:

"I like your Minard's Liniment. Like to have it in the house. I have found your Minard's Liniment especially good for barbed wire cuts on horses."

A family doctor prepared Minard's Liniment over 50 years ago. Still invaluable in every stable and every house.

"Just about always," he replied.

"Don't be a loon, Ernie," said Mr. Slocum. "It would be throwing money away. Take my advice and save up and get yourself a car, a bungalow, a radio and a wife, and settle down. You got the makings of a nice little business here. If you did less mooning around and got out and mixed with folks more you could build it up to something mighty sweet. How moping off to the ends of the earth would help trade I don't see."

"Oh, it's just a wish," said Ernest. "Probably I'll never be able to afford to go abroad, or any place. Thanks for taking my picture, Mr. Slocum."

"Ernie," said Mr. Slocum, "I got a proposition to make to you."

Ernest slid down from the horse and endeavored to look shrewd and businesslike.

"I shall be glad to entertain it," he said.

"My boy, Luther," said Mr. Slocum, "has no head for shoes."

"Beg pardon?"

"My Fred has, my Roy has, my Len has," said Mr. Slocum, "but not Luther. He just hasn't got the gift. Why, say, only yesterday he let a customer get out of the store with a pair of three-fifty ties on, when he should have sold her at least two pairs of six dollar shoes, and some hosiery. That," said Mr. Slocum, "convinced me that Luther has no vocation in the shoe line. So I want to set him up in some business where it don't count against you if you dawdle around some. Tell you what I'll do, Ernie. I'll give you five thousand, spot cash, for this shebang, with its stock, fixtures and good will. Is it a deal?"

"It is not," said Ernest, firmly.

"With five thousand you could go round the world till you were dizzy," argued Mr. Slocum. "You'd have to stuff half the horses in the state of Iowa to make that much. Is it a deal?"

"No," said Ernest. "Thank you just the same."

"You need not expect me to tilt the ante," said Mr. Slocum. "Five thousand is my offer. Take it or leave it."

(To Be Continued)

Zoo Ostrich Was Clever

Polly, the Cincinnati Zoo's prize ostrich, was her own fire department when a visitor carelessly tossed a burning cigarette on her back. She went into an anguished version of the Highland Fling. Before keepers could reach her with a fire extinguisher, however, Polly, stepping high in pain, reached around with her long neck and plucked out the burning tail feathers with her bill.

In a free country the right to work deserves as much protection as the right not to work.

Little Helps For This Week

Wherefore seeing we also are compassed about with so great a cloud of witnesses, let us lay aside every weight and the sin that doth so easily beset us, and let us run with patience the race that is set before us. Hebrews 12:1.

Could we lift the veil between, Could we for a moment witness Those unnumbered hosts that stand Calm and bright on either hand; What a joyful world would cheer, What a faith serene would guide us, Great may be the danger near, Greater are the friends beside us.

We are compassed about with a cloud of witnesses whose hearts throb in sympathy with every effort and struggle, and who thrill with joy at every success. This thought should check every worldly feeling and unworthy purpose and enshrine us in an atmosphere of heavenly peace. They have overcome, have risen, and are glorified, but they remain our comforters in every hour of darkness. They also grieved, doubted, and struggled, but in their victory we see the certainty of our own.

Listed Under Mishaps

Reporter Had Difficulty Finding Data On Bomb Explosion

Recently, says Neal O'Hara in the New York Post, a reporter on a New York morning daily tried to dig up clippings in the paper's reference library on the Wall Street bomb explosion of some 15 years ago in which 36 persons were killed. But looking through the filing system under "Explosions," "Disasters," "Bombings" and "Wall Street," he couldn't find a thing. The envelope of clippings finally turned up under the heading of "Mishaps."

Up time and again because of kidney and bladder weakness? Head nature's warning! Your system may be clogged with poisonous wastes. Take GIN PILLS to soothe and tone up the kidneys-- better you feel. -- see how much "prove their merit through their use!"

GIN PILLS FOR THE KIDNEYS

Be Careful About Children's Colds

TREAT THEM PROVED WAY

More mothers use VapoRub than any other medication of its kind--they have proved it by use in their own homes. It was further proved in the world's largest colds-clinic. No "dosing"--just massage VapoRub on throat, chest, and back at bedtime. Almost at once, its poultice-and-vapor action starts to loosen phlegm, relieve irritation and coughing, help break local congestion. Often, by morning the worst of the cold is over.

LOCAL & GENERAL

Miss Joyce Morgan visited with Mr. and Mrs. W. Sutherland at Ponoka for a few days this week.

Ed Ford has joined a hunting party in the Nordegg country. We hope Charlie has his usual luck.

Miss Dorothy Ranton was visiting relatives in Edmonton over the weekend.

Miss Edith Webster was soloist at the Westcott and Didsbury United Churches on Sunday.

Mrs. Roy Clemens of Fernie, B.C., visited with Mr. and Mrs. M. B. Clemens for a few days last week.

Archie Boyce will hold a Community Sale in the near future. List your articles for sale with C. E. Reiber.

Rev. A. S. Coughell left on Monday for Warner Alta., where he will assist with the "Further With Christ" Mission in southern Alberta.

Mrs. R. D. Smith left on Tuesday for Junction City, Iowa, where the remains of her mother, Mrs. Nichols, will be interred.

Mr. Jack Smith, who has been on the R. D. Smith farm for the past few weeks returned to his home at Sunnyslope on Tuesday.

The top-notch names of radio, screen, vaudeville and concert stage are all together in the biggest show of all time, "Big Broadcast of 1937" at the movies this weekend.

The I.O.D.E. are holding their Annual Dance, November 24th. Reserve this date. Watch for this date. Watch for further particulars.

Frank Moyle, who has been in the mining area around Great Bear Lake, returned home last weekend. He travelled by boat to Fort Smith and by plane to the head of the rails at Waterways.

Mr. C. E. Tuggle left Tuesday to visit his old home near Kansas City. Emmor has not visited his old home for 30 years and expects to be away about two months.

Mr. and Mrs. James Inglis of Duluth, Minn., visited with their niece Mrs. P. Miquelon over the weekend. They were enroute for Phoenix, Arizona, where they will spend the winter.

K. Roy McLean, Eyesight Specialist, 210 Southam Building, Calgary, will be at the Rosebud Hotel on Monday morning, November 8th.

The Westcott W.I. will hold their annual Bazaar on November 19th. In connection with the bazaar will be an "Amateur Nite" contest with cash prizes.

The "Y" meeting which was to be held on November 9th has been postponed to November 16th. The meeting will be held at the home of Mrs. E. Shantz. Miss Ruth Johnston will have charge of the topic for the evening.

Mrs. A. Schwesinger entertained at Hallow'en Tea on Saturday in honor of Mrs. A. Peck, who will be leaving shortly to spend the winter with her parents in B.C. Teacup reading was very much enjoyed. The ladies all wished Mrs. Peck a very pleasant journey and a safe return in the spring.

A number of members of the local Masonic lodge paid a visit to Ashlar Lodge, Calgary on Thursday last. Members also accompanied Dr. Clarke to Olds on Monday and Red Deer on Tuesday evening when he paid his official visit as district deputy grand master of district 4.

Nick Nowak, the shoemaker, and Joe McDonald, the barber, who have occupied the building next to the Pioneer Office for several years changed their locations Wednesday. Mr. Nowak will occupy the Scrutton property on Main street while Mr. McDonald will locate himself in the small building between Berschte' and Steven's Garage.

Chicken supper? Yes indeed! The Evangelical ladies Aid of Didsbury are having a Chicken Supper in the basement of their Church on Saturday, November 6th, from 5:30 p.m. to 8 o'clock. Not only will there be chicken, done to a turn, but also everything good to go with it. —Don't miss it—This is for everyone so invest 35 cents in a grand meal.

The annual meeting of the Westcott Social Credit group will be held on Monday, November 8th, at the Westcott School at 8:30. Ladies please bring refreshments.

A "Barn Dance" will be the attraction at the 20th Century Club meeting which will be held on Monday evening, the date having been changed on account of the Carnival Concert. All who attend are expected to dress as farmers. A prize will be given for the best costume. Remember, it is dues night.

Mr. and Mrs. Pete Miquelon entertained at a farewell party in honor of Mr. and Mrs. Paul Stalder of Olds last week. Mr. and Mrs. Stalder are leaving on November 3rd for Switzerland where they will make their home. Bridge and Monopoly were played and a lunch was served by the hostess. A number of gifts were presented to the guests of honor.

Evangelical Church Notes.

Next Sunday morning the pastor will preach from the subject, "A Religious Dictatorship." In the Evening the subject for discussion will be "Life's Ideal."

Burnside Notes

Mrs. Fred Thompson is visiting friends in Calgary.

Mr. Hugh McLean, the Misses Sadie and Gertie McLean and Marjorie Pross are Sunday visitors with Mr. and Mrs. Archie Weber.

Lone Pine W.I. will meet next Thursday, November 11th, at the home of Mrs. Otto Faas, with Mrs. Emily Hunter as joint hostess.

Miss Marjorie Eckel, of Swift Current, who had been visiting her aunt, Mrs. N. Eckel, left on Sunday to visit at Morley with her sister, Mrs. Ivan Loughheed.

The young people of Carstairs United Church will put on their play, "Plain Jane," in Lone Pine Hall this Friday evening, November 5th. Admission 25c and 10c.

Mr. Alvin Keiver, of Sunnyslope, Mr. and Mrs. Otto Faas, Mr. Kenneth and Miss Marjorie Burns, spent Sunday afternoon with Mrs. Eckel and Robert.
